WELCOME TO THE BEND URBAN TRAILS SYSTEM!

The Bend Urban Trails System, developed and managed jointly by the Bend Park & Recreation District and the City of Bend, connects our community and encourages recreation and non-motorized transportation.

Trails in the system traverse many different landscapes, including established parks, natural forested areas, and urban areas both sparsely and densely developed. The Urban Trails System currently includes approximately 63 developed miles, with more trails under development each year. The Bend Park & Recreation District is committed to increasing and improving the primary and connector trail routes as rights-of-way and funding opportunities become available.

BEND URBAN TRAIL OPPORTUNITIES

LARKSPUR TRAIL

The Larkspur Trail extends 4.1 miles between Pilot Butte Middle School and Larkspur Park, passing through Pinewood Natural Area and Pilot Butte State Park. Both Pilot Butte and Larkspur parks have ample parking and restroom facilities. Walkers can add an additional mile by climbing the trail to the summit of Pilot Butte or can proceed north from the park on a paved trail to Neff Road.

COYNER TRAIL

The Coyner Trail extends approximately 1.4 miles between Juniper Park and the Larkspur Trail. The section west of 15th St. to Juniper Park is paved to an accessible grade, while the segment east of 15th St. is a natural surface trail on easement that will be upgraded once the property develops.

CASCADE HIGHLANDS TRAIL

Good for mountain bikers and walkers alike, this trail begins at Overturf Park on 17th St. and travels west up and over Overturf Butte through the Skyliner Summit neighborhood to the roundabout at Mt. Washington Dr. It then continues west through Cascade Highlands, before connecting to the Forest Service Phil's Trail system. 4.6 miles in total length, the trail provides a mix of paved and unpaved surfaces.

CENTRAL OREGON CANAL TRAIL

From Blakely Park, the trail follows along the west side of Brookswood Blvd. and then heads southwest through Central Oregon Irrigation District (COID) property to an intersection with the Deschutes River Trail. At this point trail users can go either up or down stream along the river. Or, from Blakely Park, trail users can cross to the east side of Brookswood Blvd. and head south to the Central Oregon Canal and take the ditch-road east along the canal to American Lane where the COID trail currently ends. Total trail distance is 3.5 miles from Reed Market Rd. to the Deschutes River.

TRAIL ACCESSIBILITY

It is the goal of Bend Park & Recreation District to provide trail access for all. However, not all existing trail segments have been evaluated nor are all trails intended to be fully accessible routes. The trails on this map may present obstacles, running slopes, cross slopes, narrow tread widths and unstable surfaces, making them inaccessible for some users. Trails at Farewell Bend, Riverbend, Pioneer and Pine Nursery parks offer the best access for visitors with mobility aids. Updated information about the condition and accessibility of trails is available by calling 541-389-7275. It is the trail user's responsibility to determine if trail difficulty is appropriate for his or her skill level.

OFF-LEASH DOG PARKS

Bend has seven areas for people to recreate with their dogs off-leash. Unless otherwise indicated, dogs must be leashed on trails and in parks.

SHEVLIN PARK TRAILS

Shevlin Park is Bend's largest park encompassing 603 acres in a natural setting. The park offers many different types of trails and provides for a variety of recreational experiences. Tumalo Creek flows through the length of the park.

Shevlin Park is home to the most diverse old growth forest at this elevation in the region and an abundance of animal life. This includes migratory birds, deer, elk, bear and the occasional cougar.

Parking is available at the park entrance on Shevlin Park Road and at Shevlin Commons, and picnic sites are dispersed throughout the park. Restrooms are located at the entrance and at the south end.

Dogs must be on-leash on all Shevlin Park trails.

Loop Trail: This 6-mile trail follows the rim of the canyon, runs through old growth ponderosa pine, includes a few short, steep hills and crosses Tumalo Creek twice.

Tumalo Creek Trail: This 2.5-mile trail follows the creek upstream from the park entrance to the southern end of the park, where it joins the Deschutes National Forest trail system.

Mountain Bike Trail: This is a preferred route for mountain bikes, but is open to walkers as well. The trail follows along the canyon on the west side of the park, and links with the Forest Service Mrazek Trail. Riders may also take the east road out to the Forest Service trail system.

Accessibility: The road running through the middle of Shevlin Park is paved and can accommodate most ability levels. The trail system covers a variety of unimproved surfaces. The Shevlin Commons parking lot provides access to a 0.3-mile asphalt path that allows those with physical challenges to view the park and the Cascade mountain range from the east rim of Tumalo Creek canyon.

DESCHUTES RIVER TRAIL SYSTEM

DESCHUTES RIVER TRAIL

WELCOME TO THE DESCHUTES RIVER TRAIL!

The Bend Park & Recreation District, along with the City of Bend and private land owners, is working toward implementing the community's vision for an uninterrupted river trail. The trail will parallel the Deschutes River running through the heart of Bend. Once fully completed, the 19 mile trail will extend from Tumalo State Park to Meadow Camp with further connections to Sunriver. This map shows only existing trails and access points open to public use. The map also shows the river as a water trail and access points to it. Trail users should respect private property and sensitive riparian areas by staying on the trail. The river trail is divided into five reaches, defined by the surrounding landscape character.

AWBREY REACH

This northernmost section of the Deschutes River Trail is constructed on top of the buried Tumalo irrigation canal. It has an unpaved surface and includes a few moderate hills. Along the middle stretch of this reach, the river drops into a deep canyon, but the trail stays high on the canyon wall, offering spectacular views of the river below and of the Three Sisters in the distance. A steep climb up the Archie Briggs Canyon Trail connects to Mt. Washington Drive. Visitors can best access the trail from Sawyer Park. There is limited on-street parking at Sawyer Uplands Park with a connecting route down to the river trail.

RIVER RUN REACH

This section of river trail is located on the west bank of the river over the Tumalo irrigation canal pipe. The wide trail surface is unpaved and relatively flat. It runs between the river and a high canyon wall, and passes through the River's Edge golf course and adjacent neighborhoods. A newer section of the trail located on the east bank connects Pioneer Park to Revere Avenue. Boat landings at First Street Rapids Park and Riverview Park provide water trail access. There are several wetlands in this reach, inhabited by songbirds, trumpeter swans, otter and beaver. Osprey frequently nest and fish here.

PIONEER REACH

This reach passes through the oldest and most established sections of Bend. The trail isn't always along the river, sometimes following sidewalks through neighborhoods and downtown. The trail passes through beautiful Drake Park on Mirror Pond and ends at McKay Park and Colorado Street. There are several footbridges along the way offering opportunities to cross the river. Access the trail from any of the adjacent parks. Boat landings at McKay, Drake, Harmon and Brooks parks provide water trail access.

OLD MILL REACH

Once the site of two large ponderosa pine lumber mills, today the Old Mill reach is a mix of river parks, trails and the Shops at the Old Mill District (see inset). Trails exist on both sides of the river in addition to an extensive private trail system throughout the Old Mill District. Three footbridges connect trail legs on either side of the river, providing convenient walking loops. On the east side, the trails are paved from the Shops at the Old Mill District to the upper end of Farewell Bend Park at the Bill Healy Bridge. The trail on the west side offers a mix of paved and unpaved surfaces. Farewell Bend and Riverbend parks provide boat landings for paddlers using the Deschutes River water trail.

SOUTH CANYON REACH

This reach has trail sections on both sides of the river, connected by a footbridge approximately 1.5 miles upstream of the Farewell Bend Park bridge. The river flows fast here through a beautiful canyon, cascading over rocks and logs.
WEST SIDE: The trail on the west side of the river passes through Mt. Bachelor Village. Bicycles are not allowed on this section of the river trail, but there is an alternative mountain bike route that connects the Bill Healy Bridge to the Haul Road Trail along Century Drive.
EAST SIDE: The east side trail at the northern end of this reach is unpaved, narrow and rocky in places. The trail continues to the South Canyon Footbridge and crosses to the west side to loop back to town. Users can choose to divert up to Brookswood Blvd. on a side trail that originates just upstream of the COID power plant and short timber bridge. At Brookswood, the trail follows the sidewalk through various neighborhoods before reaching Wildflower Park then ultimately River Rim Park.

WATER TRAIL

The Deschutes River corridor provides for both land and water-based trail opportunities. The water trail allows paddlers to enjoy the river and connect to parks and other destinations along its bank. Access points and boat landings are available at several locations along the water trail. Be aware that the river difficulty changes dramatically from gentle moving water to Class 4 rapids above the Bill Healy Bridge. Floating the section above the Healy Bridge is recommended only for expert boaters. The Colorado Street, Bend Hydro and Tumalo Irrigation dams require mandatory portaging.

FLOATING THE RIVER

Floating is popular from Riverbend Park at Columbia Street (across from Farewell Bend Park) to Drake Park on Riverside Blvd. Be cautious. The current is stronger above the Colorado Street dam than it appears. **Watch for the warning signs and exit the river on the left above the Colorado Street bridge.** Floaters must leave the river and portage around the dam. The Ride-the-River shuttle operates between these two parks throughout the summer season. For a schedule visit the Cascades East Transit website at cascadeseasttransit.com or call 541-385-8680. For non-motorized boat launch sites, look for the "crossed oars" symbols on the map.

Look for this symbol along the Deschutes River Trail:

DESCHUTES RIVER TRAIL

POINTS OF INTEREST ALONG THE DESCHUTES RIVER TRAIL

1. Sawyer Park offers the opportunity to spot a variety of birds and wildlife and is included in the Oregon Cascade Birding Trail system.
2. The historic Rademacher House and plaza overlook Mirror Pond and Drake Park, with the Three Sisters visible in the background. This site includes a sign interpreting Bend's founding and early history.
3. Located across the foot bridge from Drake Park, Pageant Park was named to commemorate the Bend Water Pageant, a favorite community event that ran from 1933-1965. An interpretive sign describes the event highlight, the launch of large, lighted floats on Mirror Pond.
4. This Drake Park interpretive sign (located directly in front of the public restrooms) describes Bend's early sense of community spirit.
5. McKay Park is the site of the Oregon Trunk Railroad. An interpretive sign in the park describes Bend's early railroad history.
6. Located across the Deschutes River from McKay Park, Miller's Landing Park was a holding area for the Miller Lumber Company in the early 1900's. As the newest riverfront park, it will be open in summer 2013.
7. Across the river from Farewell Bend Park is Riverbend Park, a popular site for events, river access and picnicking.
8. Farewell Bend Park honors the history of the logging industry at this site with two interpretive signs. Additional signs along the boardwalk explain a riparian restoration project and other steps being made to care for the health of our river and its ecosystem. The park includes a playground and restrooms.
9. The boardwalk here offers a view of Central Oregon Irrigation District's Hydro site, where irrigation water is dropped back to the river through two turbines, generating electrical power. The public has access to this trail section thanks to an agreement with COID–please stay on the designated trail.
10. Mt. Bachelor Village Resort, in partnership with Brooks Resources and the High Desert Museum, has provided a series of interpretative signs along this section of trail which describe the native habitat, foliage, and other points of interest.

TRAIL USE REGULATIONS

Please help keep the trail experience safe and pleasant for all users:

- Some sections of the trail are on private property. Please stay on the designated trail.
- Areas along the river are sensitive wildlife habitat. Please do not walk along the river bank.
- Motorized vehicles are not allowed on the trails.
- Bicyclists are not allowed on some sections of the trails. Please observe pedestrian-only trail sections.
- City ordinances require that dogs must be on leash at all times within the city limits (except at designated off-leash areas) and their waste properly removed. Dog "rest stops" along the trails provide you with disposal bags and trash cans.
- Do not litter. Trash cans are located throughout the park system.
- No camping, drinking alcohol, smoking or fires allowed.

ADOPT A PARK OR TRAIL

The Adopt a Trail and Adopt a Park programs give community groups, families and individuals an opportunity to keep our parks and trails beautiful and fun for all. Adopters help with litter clean up, special projects and reporting concerns to the district. For more information on these programs call the Bend Park and Recreation District at 541-389-7275.

The Bend Urban Trail System and the Deschutes River Trail are managed by the Bend Park & Recreation District. To report trail concerns, call Park Services Dept. at 541-388-5435. After business hours and on weekends call 541-410-3319.
